

ANNA'S FIBER ART PORTFOLIO

Spring 2026

SAMPLE BOOK

COILED BASKET

REED BASKET

Done with 6 spokes and alternating colors of weaver.

KNITTING

Seed Stitch w yarn change

Stockinette Stitch : K1 row, P1 row

Reverse Stitch: P1 row, K1 row

1x1 Ribbing: K1 stitch, P1 stitch

2x2 Ribbing: K2 stitch, P2 stitch

Garter Stitch: K every row

CROCHET

(Sasha has this sample)

Cat coaster done with single
crochet, double crochet,
half double crochet, triple
crochet, and chain stitches.

SEWING

Sewed pocket with

- Straight seam with the running stitch
- Curved seam with relief cuts
- Design with running stitch
 - RIIIZE is my favorite kpop group and Odyssey is my favorite song from their most recent album!
 - Their songs remind me of youth and that is why I chose sky colors like orange, pink, purple, and blue

ALL LARGER PROJECTS

JUDITH SCOTT WRAP

A wrap with soft everyday objects like pajama, candle, and scarf, centered with objects that I most frequently used at home.

I wanted to show how comfy home means to me.

SLIDES QUILT

Done with stitching
triangular fabric with
slides.

INSTALLATION

An open mesh crocheted blanket with light to dark color transition and loose to tight transition.

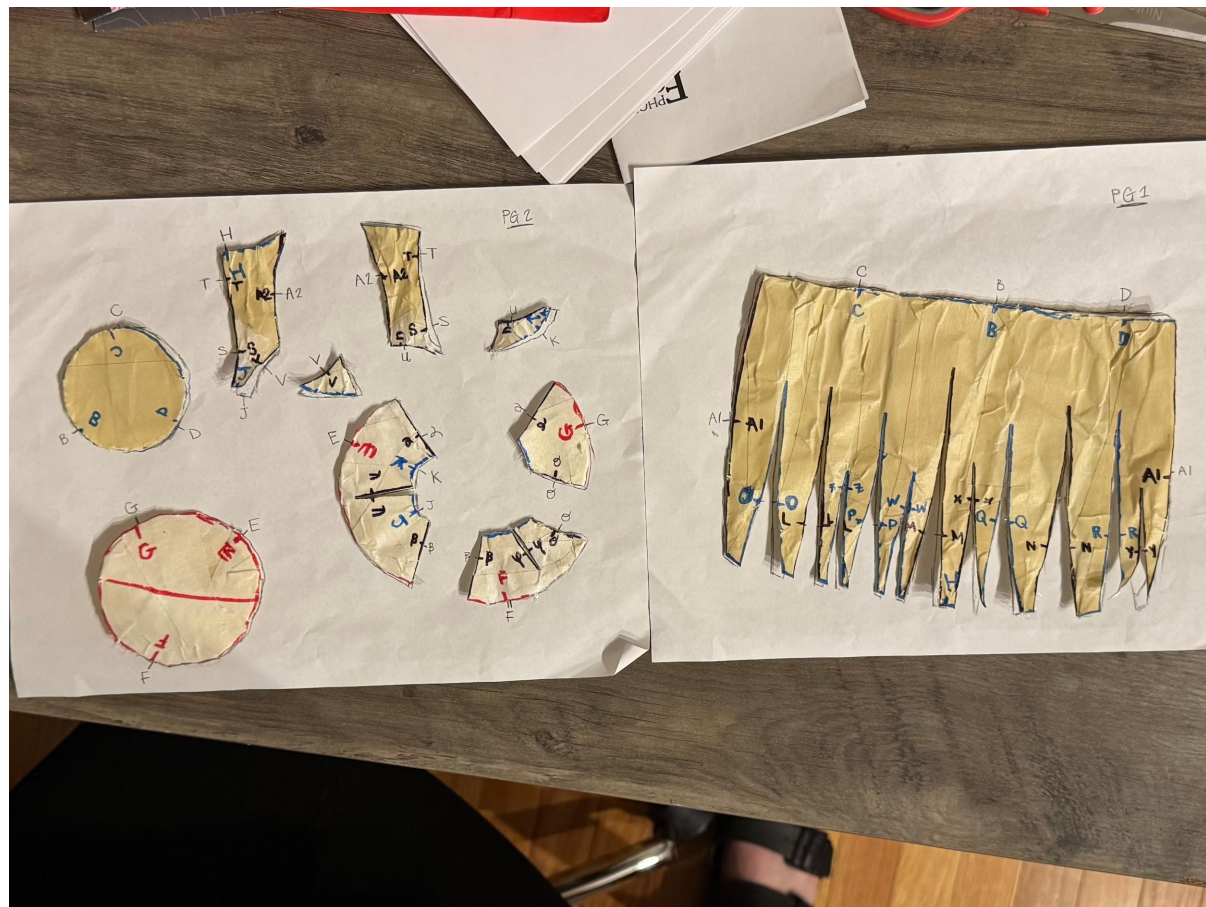

I altered how people interact with this sofa corner by adding this blanket that suggests both comfort and the hidden danger of addiction. The blanket functions as a surface that softens and transforms the space.

The work is site-specific because its meaning changes if it is placed somewhere else, and it is experience-based because it alters how people physically and emotionally engage with this corner.

REPLICA PT 1: FLAT PATTERN

Flat pattern of a goblet using tape.

REPLICA PT 2

Recreation of goblet using crochet and two times big as the original. The body is crocheted as if there is liquid spilling out. Techniques I used include single, double, half double crochet.

MORE THOUGHTS ON REPLICA

The reason why I chose to enlarge this is because I want to explore more the structure breakdown of the goblet when it is not transparent and hard anymore. In this process I got to appreciate how delicate the original structure is especially the balance between the body and the foot.

I decided to only stuff the bottom part and left the top part unstuffed and melted because I found the contrast of how useful and elegant the original structure is and how “useless” the current replica interesting.

Plus I feel a better “melting” vision of flowing liquids I want to create with the goblet not standing up and the crochet pattern I chose.

I got questions about the color choices of the crochet patterns, and not surprisingly aligned with my Artist Statment, I chose it based on instant inspiration from my surrounding and my mood. For this project, I got the inspo from Starbucks limited drinks:3

ARTIST STATEMENT

ARTIST STATEMENT

I can still feel my mother's footwork: how she lets me stand on her toes and dance with her. That memory brings me into the world of arts.

I make fiber artworks that reflect and explore my thoughts, emotions, and evolving sense of self. I become more calm and immersed as I translated movements into forms.

I am interested in how unconscious choices appear in makin. I believe my works capture who I am at that time.

I hope my audiences can understand me a little bit more through my work, and feel invited to explore such process themselves.

FINAL SELF EVALUATION

FINAL SELF EVALUATION

- Favorite Technique and why
 - Crocheting! I dont know why exactly I feel this way but everytime I have crochet hook and yarn on both hands, they just feel so close to me and I can focus more on what my hands are doing. It really helps me to concentrate.
- Most challenging class section and why
 - Reed basket is the most challenging to me. It was a lot of fun but I need to be very concentrated on the strings with my hands and it also just does not come naturally to me.
- Explore further?
 - I mentioned during midterm checkin that I wanted to explore 3D crocheting and I got to do it for replica project. So next I want to further explore interactable crochet projects like those with zippers, slide-able parts, etc.

And HUGE THANK YOU to Sasha for always being patient and giving me the best support. Wish you all the best:3
